🌐 [Ankush-Kumar-Portfolio](#)

I'm a Full Stack Developer with a passion for solving complex challenges and building efficient solutions. With experience across the entire development lifecycle, I thrive in fast-paced environments and enjoy creating seamless, user-friendly applications. Always eager to learn and innovate.

Experience

Software Developer Engineer I - Genboot Private Ltd.

Oct-2024 - Present

I worked on Klaviss, a US real estate project, handling both frontend and backend development, including notifications, the seller agent section, and an LLM feature for extracting dates from PDFs. I also debugged major issues, fixed critical bugs, and developed UI components to enhance user experience.

Jr.Full Stack Developer - ChainCode Consulting LLP

Jan 2024 - Oct 2024

I developed the feedback module for IRCTC Tejas-NFTtrace, integrated Firebase into the Sutr project, and built the Support and Offer modules for the NFTtrace admin dashboard (frontend & backend). Additionally, I developed the Wild Wheat Bakery website frontend and resolved complex bugs in Obortech, improving system stability.

Education

Full Stack Development (Full Time)

Aug 2022 - Oct 2023

Masai School, Bengaluru

Bachelor of Technology (EEE)

2018-2022

IES College of Technology, Bhopal

Technical Skills

- React.js
- JavaScript
- Next.js
- Typescript
- HTML
- CSS
- Redux
- Node.js
- Nest.js
- Express.js
- MongoDB
- Tailwind

Soft Skills

- Collaboration
- Fast Learner
- Observation
- Adaptability

Projects

● Klaviss (Genboot Private Ltd.)

I worked as a Full Stack Developer on Klaviss, a US real estate project, where I handled the frontend for notifications and the seller agent section. Additionally, I contributed to the LLM feature within Klaviss, generating prompts for extracting dates from PDFs. I also debugged major frontend and backend issues, fixed critical bugs, and developed UI components to enhance the overall user experience.

TechStack - Javascript, Next.js, material UI, Nest.js, MongoDB,

● GenHR - An HRMS tool (Genboot Private Ltd.)

I worked as a Full Stack Developer on the HRMS tool, handling both frontend and backend development. I completed the frontend setup, developed backend APIs, and created common helper functions, custom hooks, and custom components to improve reusability and efficiency. Additionally, I built the leave and admin modules, ensuring a seamless and user-friendly experience for managing various HR processes.

TechStack - Javascript, Next.js, tailwind, Nest.js, PostgreSQL

● NftTrace-marketplace admin dashboard (ChainCode Consulting LLP)

Worked on this project as a Full Stack Developer, setting up the frontend from scratch, developing the complete vendor and bus modules, and integrating real-time email functionality.

TechStack - Javascript, React.js, Redux, Node.js, Mysql

● NftTrace Tejas (ChainCode Consulting LLP)

Worked on this project in collaboration with IRCTC, developing the feedback and offers modules for both frontend and backend, and fixing various bugs to improve system stability.

TechStack - Javascript, React.js, Redux, Node.js, Mysql

● Wild Wheat Bakery (ChainCode Consulting LLP)

I worked on the frontend development of a US-based bakery shop website from start to finish. I implemented various sections, including the gift card section, customer section, contact page, menu, order catering, and the UI for the payment section, ensuring a seamless and visually appealing user experience.

TechStack - Javascript, React.js bootstrap, Nest.js

● SutR BaaS (ChainCode Consulting LLP)

SutR is a BaaS solution on Hyperledger Fabric and Google Cloud, allowing businesses to manage blockchain networks easily. I worked on the frontend, creating multiple modules, optimizing performance, and integrating Firebase for real-time data synchronization and authentication.

TechStack - Javascript, Next.js, bootstrap

Achievement

● Employee of the month

ChainCode Consulting LLP - Jul 2024

● Communication skills

TCS iON - Sep 2020
